

BRAND GUIDELINES · OCTOBER 2026

Better with every layer.

The identity of TekRevol, an AI-first software development company.

CONTENTS

Inside this guide

01 Brand foundation

What we are, the idea, personality, why orange

03 Graphic language

Layer stack, flows, glass, grid, icons, data

05 Applications

Social, print, presentations, web

02 Visual identity

Logo, color, accessibility, typography

04 Imagery and voice

Image direction, AI prompts, tone of voice

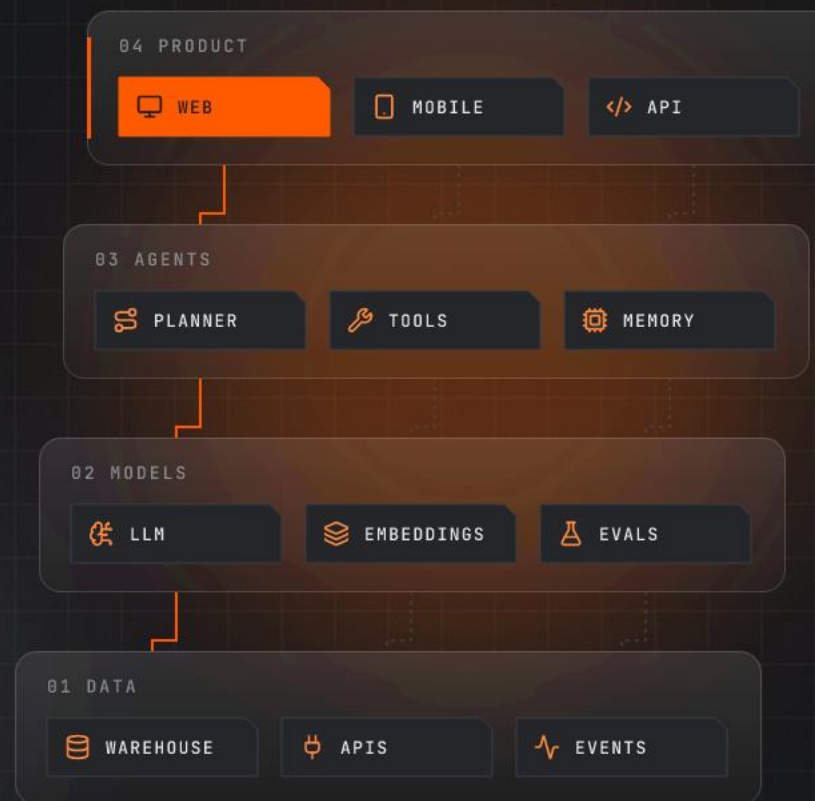

06 Tested and files

How the system was checked, where files live

01

Brand foundation

What TekRevol is, the idea that drives the identity, and how it sounds.

WHAT TEKREVOL IS

TekRevol builds the AI-native software other vendors, and other AI tools, couldn't finish.

Category

AI-first software development company. Software development stays the parent category; AI leads.

What we do

AI-native products from scratch, and AI-built prototypes taken the rest of the way to production.

What backs it

Ten years of mobile, web, cloud and custom software engineering, 800+ products delivered.

THE BRAND IDEA

Better with every layer.

TekRevol moved into AI early, scaled fast, and keeps evolving. Every project, model and architecture becomes the base for the next one.

- **Adapted early**

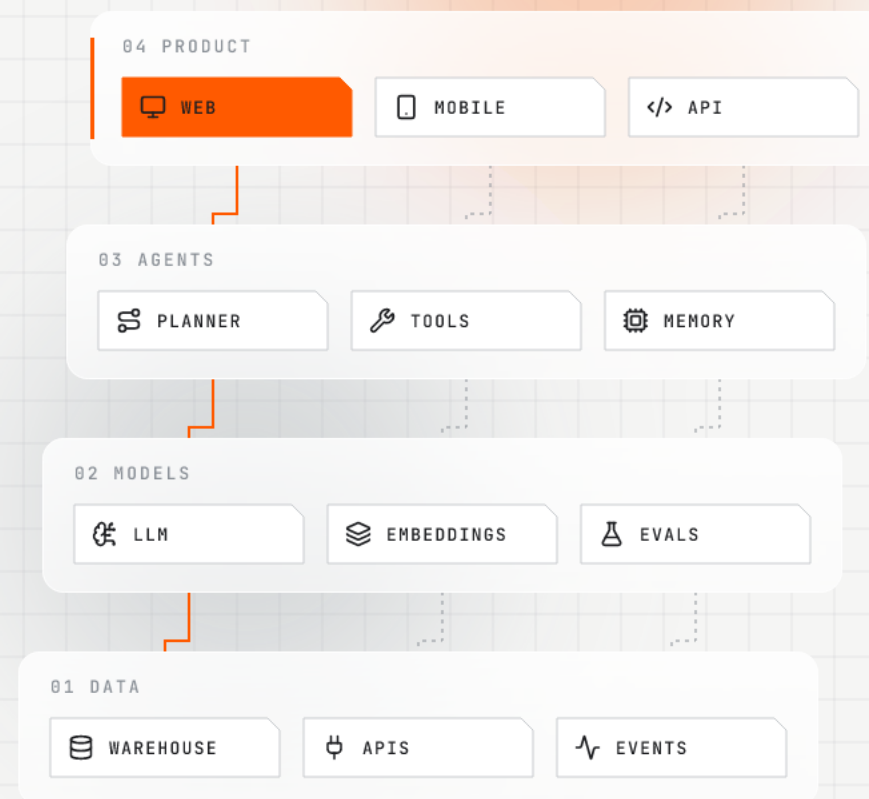

Took up AI ahead of most of its market

- **Scaled fast**

Turned that start into AI services and RevAI

- **Keeps evolving**

Each layer of work improves the next

PERSONALITY

Five traits, every touchpoint.

01

Built

Engineered, precise,
specific

Not cold or robotic

02

Quick

Moves early, ships on
schedule

Not rushed or careless

03

Evolving

Always improving the
next version

Not trend-chasing

04

Candid

Says what is true,
plainly

Not negative about others

05

Warm

Human-centered,
approachable

Not soft or unserious

WHY ORANGE

The category is a blue wall. We are the signal in it.

LeewayHertz

02

Visual identity

Logo, color and typography: the fixed parts of every TekRevol layout.

PRIMARY LOGO

**One mark. Unchanged geometry,
brighter color.**

Primary: charcoal ink on white and light backgrounds

Reversed: white ink on charcoal and dark backgrounds

■ Left plane #FF5A00 ■ Right plane #FF8A3D ■ Base bar #E2400B ■ Wordmark #1D1E21

RULES

Space, size and misuse.

Clear space on every side = X, the height of the letter T.

Minimum size

Full logo 120 px on screen, 30 mm in print. Mark alone 20 px, 6 mm.

DON'T

Stretch or distort

Full color on orange or busy imagery

Recolor

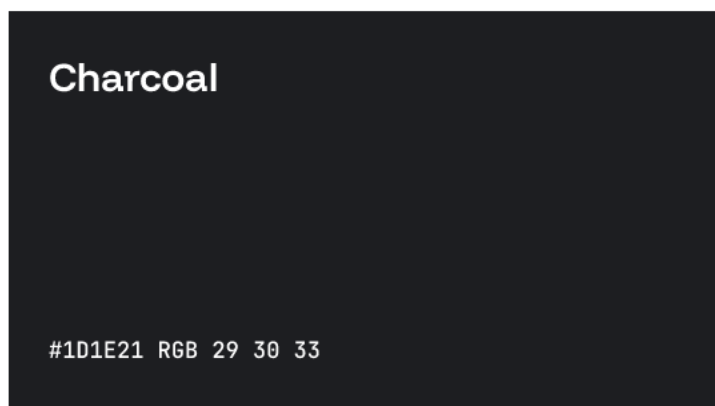

Add shadows, glows or effects

CORE PALETTE

Clean neutrals, one bright accent.

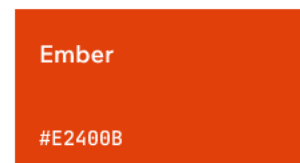

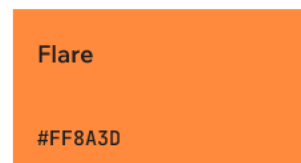

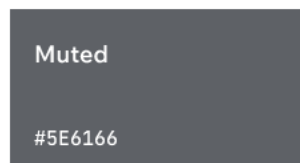

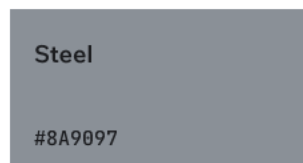

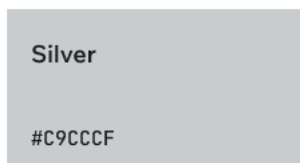

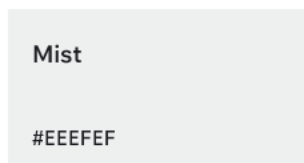

Accent: CTAs, the one highlighted word, active paths

Headlines, body text, dark sections

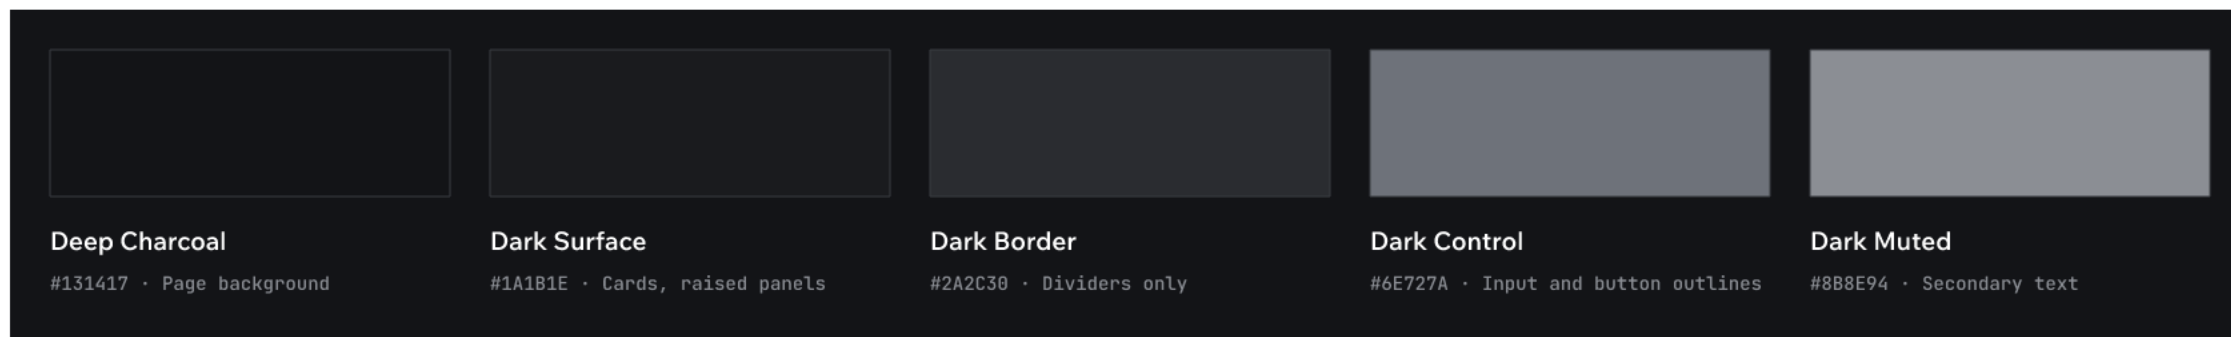

Primary background

DARK MODE AND PROPORTION

A real dark mode, not an inversion.

PROPORTION OF A PAGE OR FRAME

One orange focal point per view. The primary button is functional and doesn't count. In dark mode, Flare replaces Orange Ink for accent text.

ACCESSIBILITY, TESTED

Every text pair checked against WCAG 2.2.

Aa	Charcoal on White #1D1E21 on #FFFFFF	16.7:1	AAA
Aa	Charcoal on Orange (buttons) #1D1E21 on #FF5A00	5.3:1	AA
Aa	White on Deep Charcoal #FFFFFF on #131417	18.4:1	AAA
Aa	Dark Muted on Deep Charcoal #8B8E94 on #131417	5.6:1	AA

Aa	Muted on White #5E6166 on #FFFFFF	6.2:1	AA
Aa	Orange Ink on White #C23A00 on #FFFFFF	5.4:1	AA
Aa	Flare on Deep Charcoal #FF8A3D on #131417	7.9:1	AAA
Aa	Orange on White #FF5A00 on #FFFFFF	3.1:1	LARGE

HEADLINES

Aa

Funnel Display

SemiBold 600 and Bold 700. Modern and confident, with quietly unusual details that make headlines memorable without feeling tacky.

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789 & ? ! @ %

AI-native software, finished.

Display 88 / line height 1.0 / tracking -3%

TEXT AND LABELS

Wix Madefor Text

Regular 400, Medium 500, SemiBold 600.
Refined and calm; readable from captions
to long articles. All body copy and UI.

Aa Bb Cc 0123

Same team from kickoff to launch. Compliance
built in from the first sprint, not added at
the end.

JetBrains Mono

Medium 500, uppercase with +8% tracking.
Eyebrow labels, node labels, code and
proof numbers. Signals engineering.

AI-FIRST SOFTWARE DEVELOPMENT

800+

apps and digital products delivered

SCALE AND HIERARCHY

One clear order on every page.

STYLE	TYPEFACE	DESKTOP	MOBILE
Display	Funnel Bold	88 px	44 px
H1	Funnel Bold	56 px	34 px
H2	Funnel SemiBold	40 px	28 px
Pull quote	Funnel SemiBold	32 px	24 px
H3	Funnel SemiBold	28 px	22 px
Lead	Wix Regular	20 px	18 px
Body	Wix Regular	16 px	16 px
Button	Wix SemiBold	15 px	15 px
Label	JetBrains Mono, caps	12 px	12 px
Data large	JetBrains Mono	48 px	32 px

AI-FIRST SOFTWARE DEVELOPMENT

Finish what the last team started.

Stalled build or an AI prototype that hit a wall. One team takes it to launch.

Talk to an engineer

03

Graphic language

How TekRevol shows AI architecture: layers, flows, glass and one orange path.

SIGNATURE GRAPHIC

The layer stack.

The real layers of an AI system, stacked bottom to top. It is "better with every layer" made literal.

Glass layers

Four frosted panels: Data, Models, Agents, Product

Mono layer labels

01 to 04 in JetBrains Mono, Steel

Nodes

Line icon plus label in a notched chip

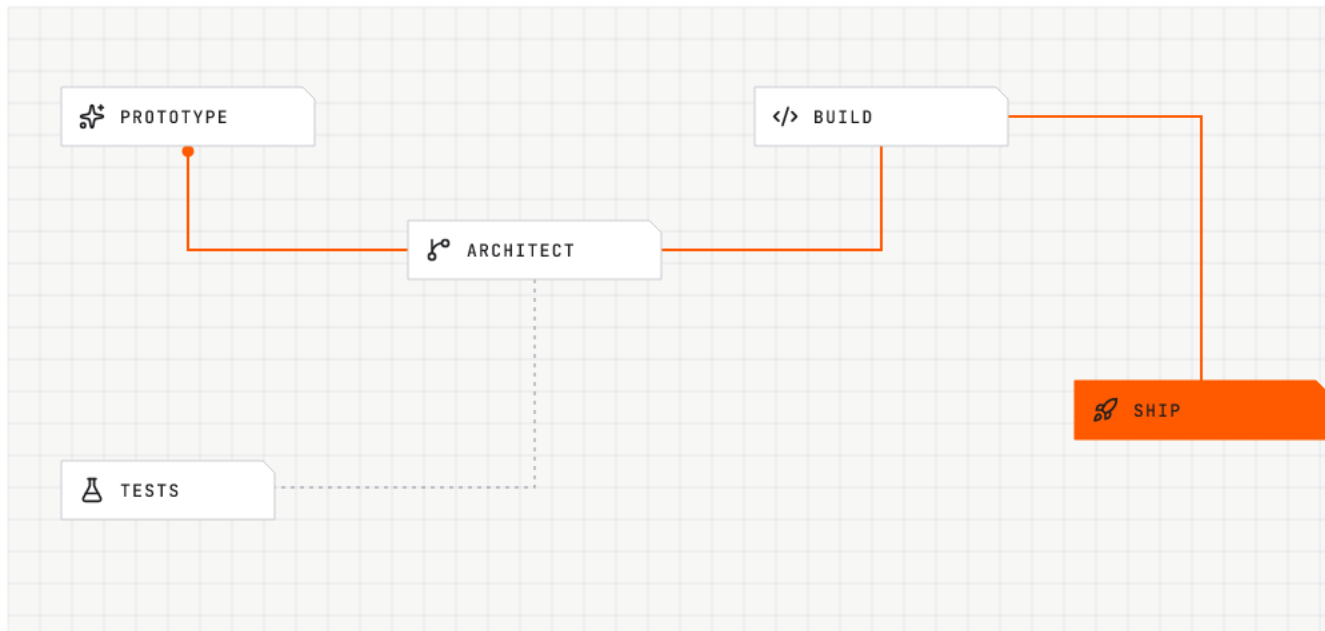

One orange path

Runs from the base to the result; the result node fills orange

Use one stack per page. Keep 3 to 5 layers. Orange path always ends at the top.

FLOW DIAGRAMS

Show the work as a flow.

Right-angle connectors

Steel, 1.2 px dashed; never curves or diagonals

One active path

Orange, 2 px solid, starts with a dot

Nodes

Notched chip, line icon, mono uppercase label

Grid

24 px blueprint grid at 14% Steel

Keep it short

3 to 6 nodes; label with verbs or real components

GLASS, GRID AND NOTCH

Depth with restraint.

FROSTED GLASS

White at 60 to 80%, 1 px white edge, 16 px radius, soft shadow. Panels hold content or layers.

Glass is structure, never decoration: no liquid or molten effects, and never behind body text.

BLUEPRINT GRID

24 px on cards, 40 px on slides and banners. 14% Steel on light, 4.5% white on dark.

The grid sits behind diagrams only.

THE NOTCH

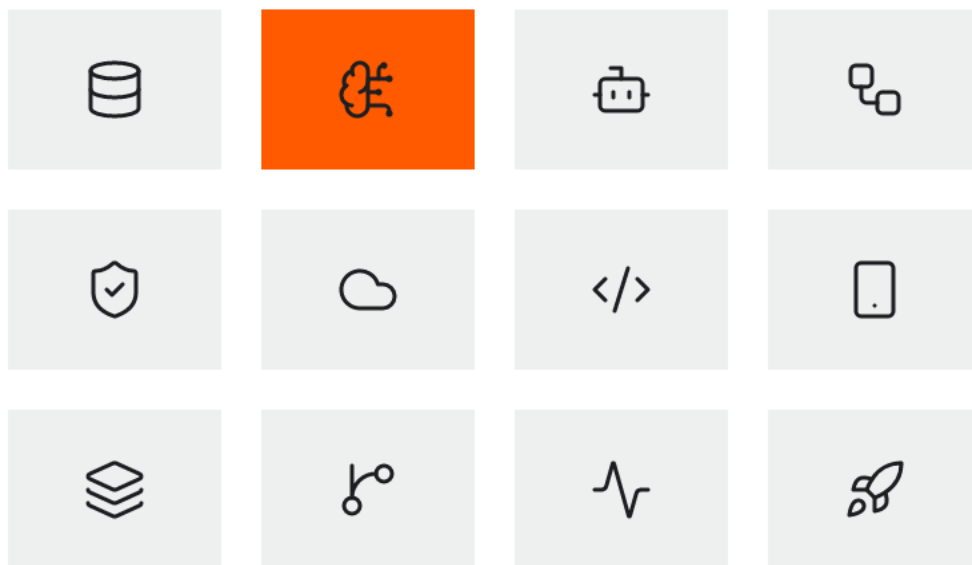

45° cut from the logo.
8 px buttons, 16 px cards, 32 px hero panels.

Primary button

One notched element per view.

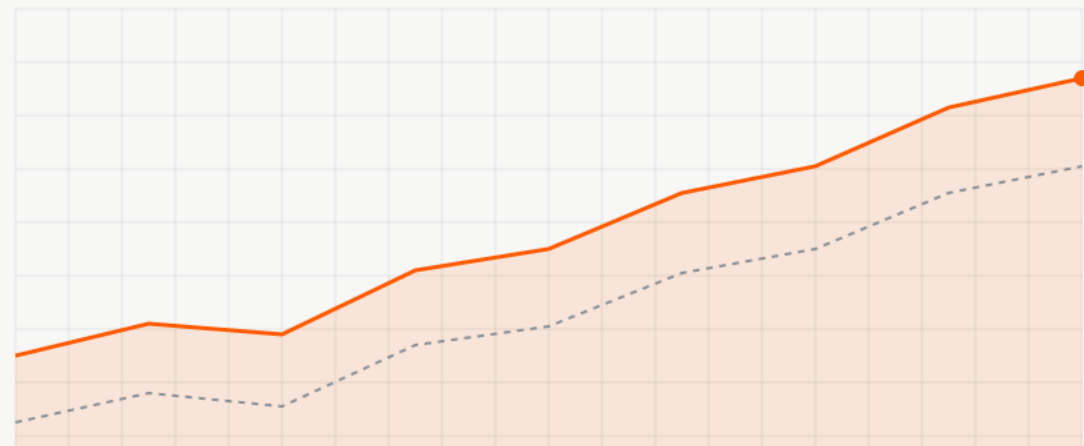

ICONS AND DATA

Thin lines, honest charts.

Lucide icons, 1.5 px stroke, charcoal. One active icon may sit on orange.

ILLUSTRATIVE CHART

TekRevol data in Orange, comparison in dashed Steel. No 3D, no gradients on bars.

04

Imagery and voice

What TekRevol pictures look like,
and how TekRevol sounds.

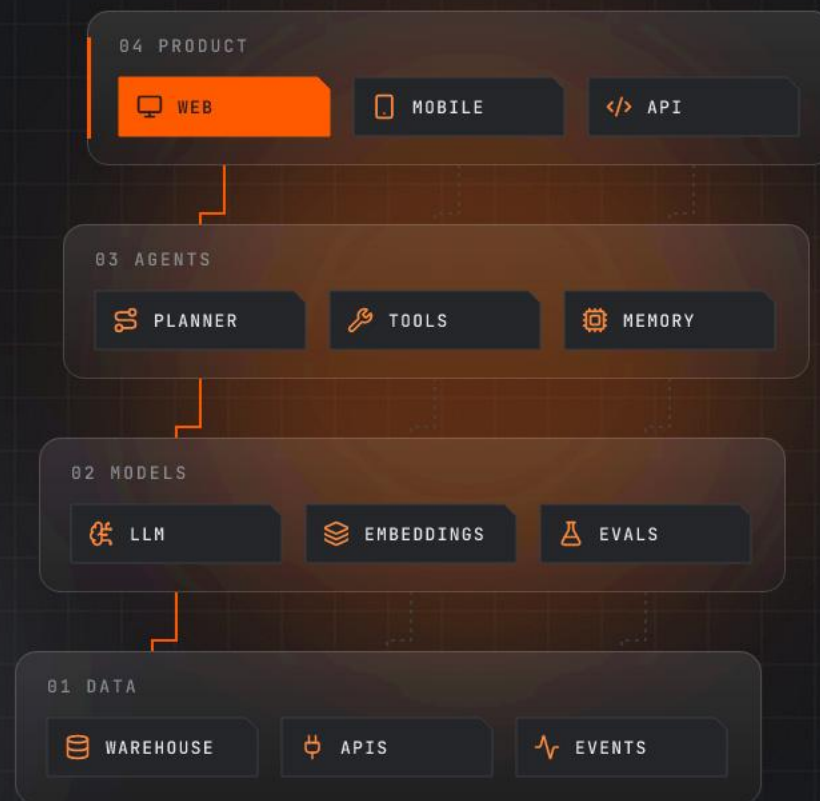

IMAGE DIRECTION

Show the system, then the people.

Architecture first

Diagrams and layer stacks lead heroes, slides and social. They explain what we build better than any stock photo.

Real people, real work

Documentary photos of the team in bright spaces: whiteboards, code reviews, launches. One orange detail per frame.

Product on screen

Real TekRevol interfaces on devices on light surfaces. Screens are always real UI, never generated.

AI IMAGE PROMPT, PASTE AFTER YOUR SUBJECT

Style: TekRevol brand. Clean, bright, modern workspace in white and light grey, charcoal details, one bright orange accent (#FF5A00). Documentary photography, real people and devices, soft daylight, shallow depth of field, generous negative space, editorial quality. Avoid: robots, glowing brains, holograms, blue or purple light, neon, text, logos, clutter, more than one orange object.

VOICE

TO

NE

OF

VOICE

Write like the smartest person in the room with nothing to prove.

Clear

Short, active sentences. One idea each.

Specific

Real numbers, named standards, real work.

Candid

Name the situation, never the vendor.

No em dashes. No invented statistics. US spelling. Sentence case.

SAY THIS

Finish what the last team started.

Built for HIPAA from the first sprint.

Your AI prototype got you 80% of the way.

NOT THIS

Revolutionary AI-powered solutions.

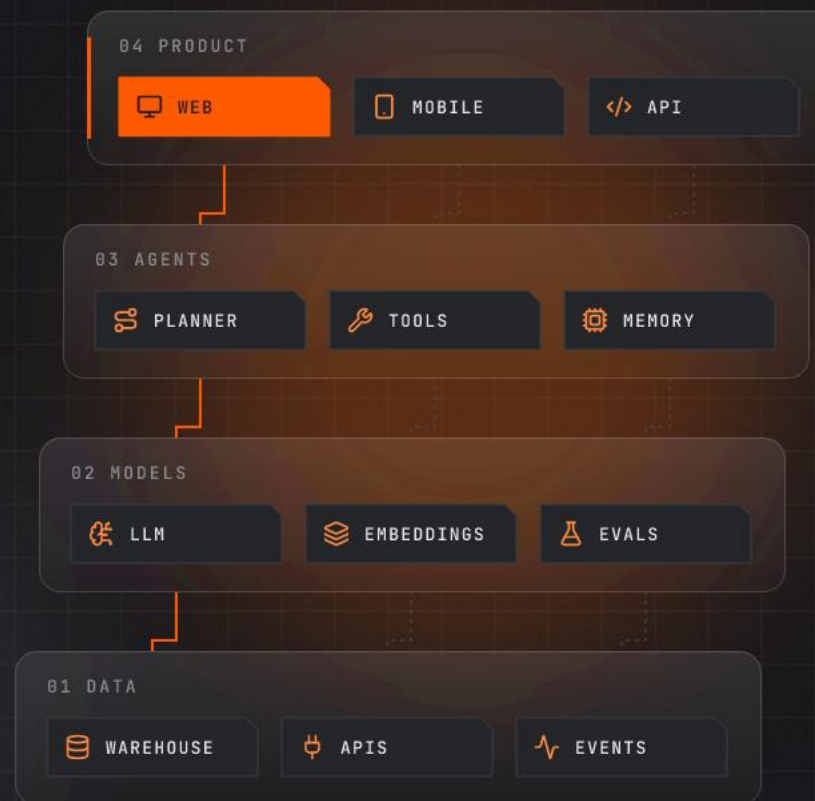

Cutting-edge, robust, seamless security.

Unleash the power of AI today.

05

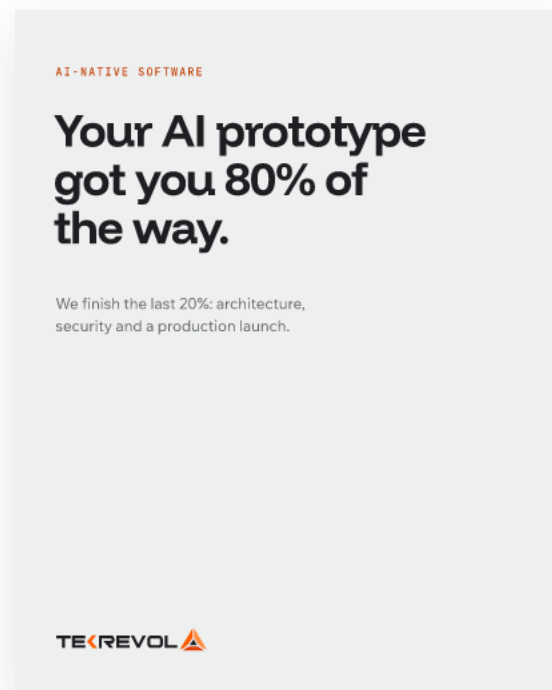

Applications

The system at work across the touchpoints TekRevol uses most.

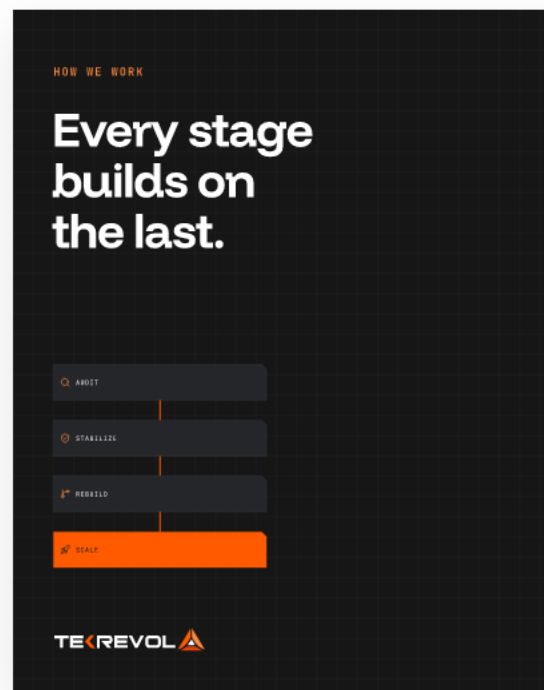

SOCIAL AND PRINT

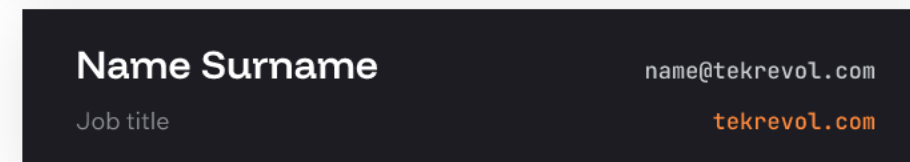

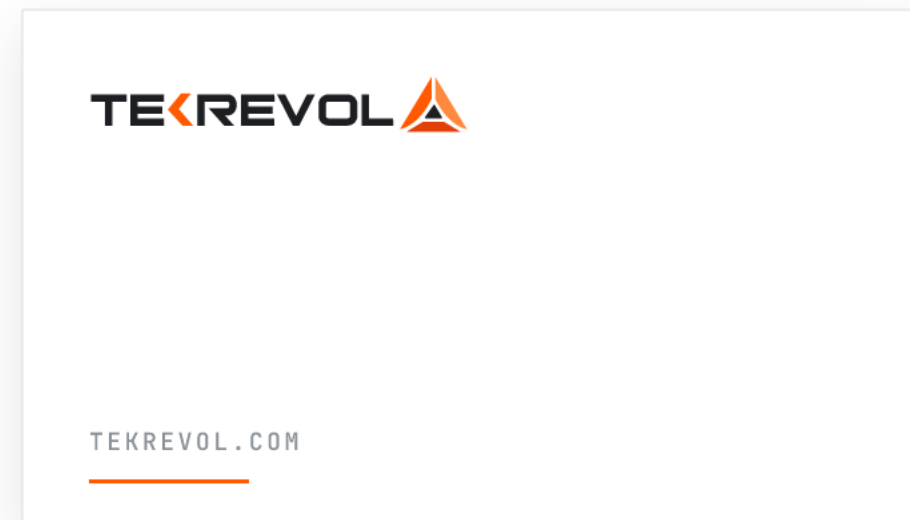

LinkedIn and business card.

LinkedIn post, 1080 x 1350

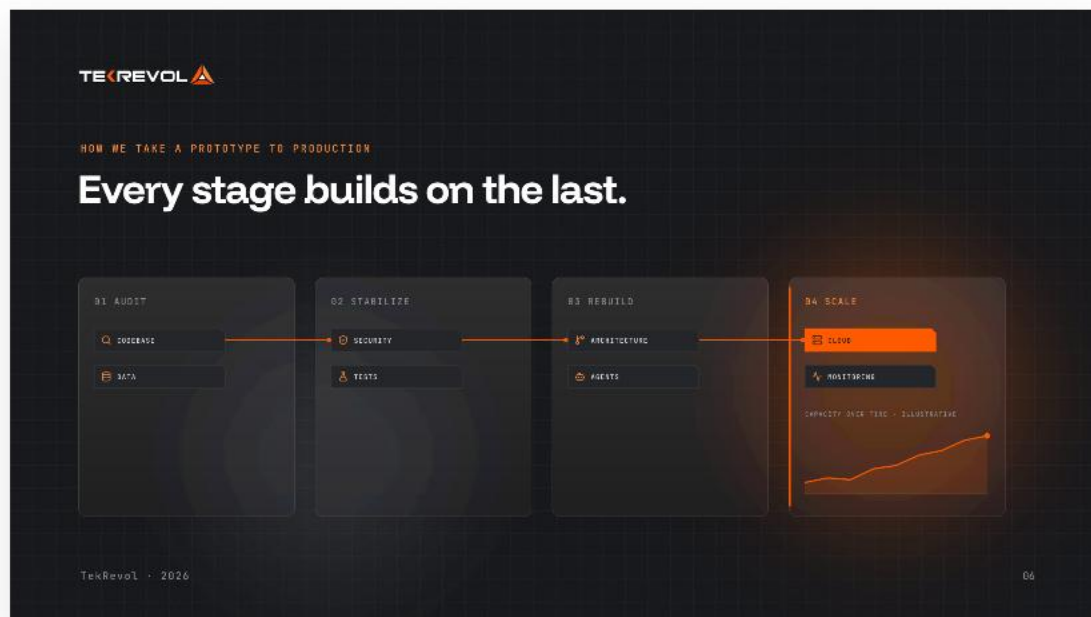

Carousel cover, dark mode

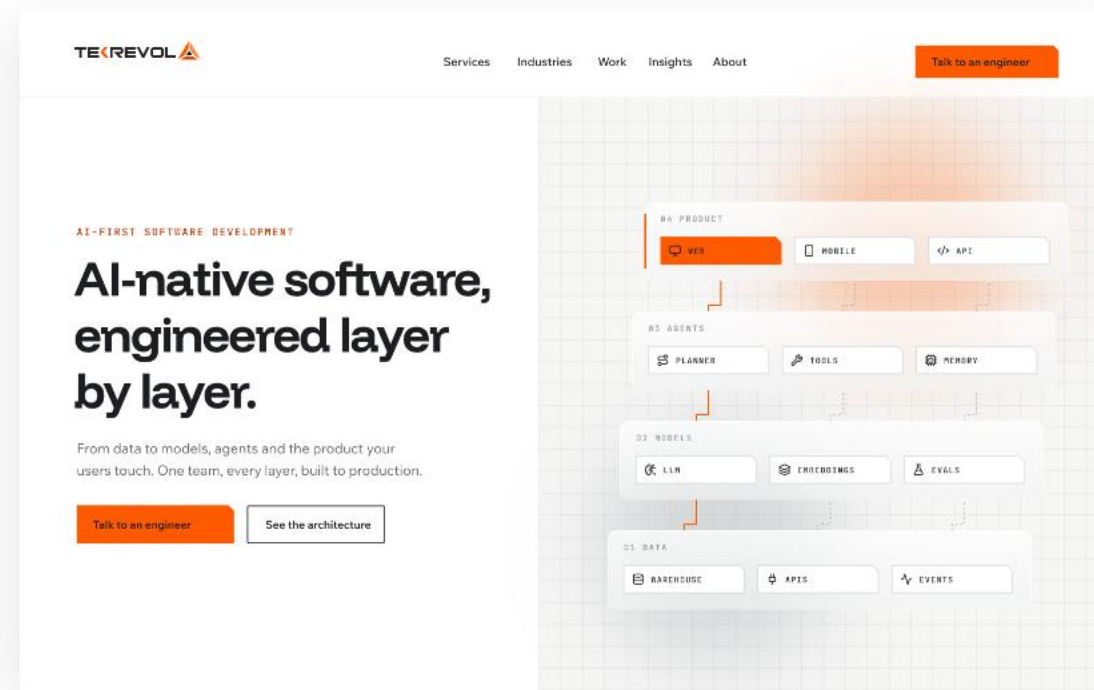

SCREENS

Presentations and the web.

Presentation slide, dark mode

Website hero, concept for a later phase

HOW THIS SYSTEM WAS TESTED

Checked before it ships.

✓	Contrast	All text pairs measured against WCAG 2.2; every body pair passes AA, most pass AAA
✓	Legibility	Type scale checked from 12 px labels to 88 px display, desktop and mobile
✓	Dark mode	Every color has a dark equivalent; control borders meet 3:1
✓	Color blindness	Orange and charcoal differ in lightness, so meaning never relies on hue
✓	Fonts	Free under the SIL Open Font License; available from Google Fonts
✓	Print	CMYK values provided; bright orange to be matched with a printer proof
✓	Applied	System tested on social, presentation, business card and web layouts

FILES AND NEXT STEPS

Build on it, layer by layer.

Logos	SVG and PNG, color, white, mono, favicons
Fonts	Funnel Display, Wix Madefor Text, JetBrains Mono
Tokens	Colors, type, spacing and motion as JSON
Graphics	Layer stack and flow diagram samples

All files: Projects / TekRevol / 01-brand-system
